LAB TREPHINE™

TREPHINE PRODUCTS

The **LABTREPHINE™** product line offers a wide selection of recipient radial trephines, trephine blades and donor punches. All trephine products are available in a variety of different sizes and the option to include vacuum functionality, providing you with the ability to secure the trephine firmly in place. In addition, our advanced trephine blade technology is designed specifically to promote reproducible wound architecture while reducing the loss of endothelial cells during transplantation.

LABTREPHINE™

TREPHINE VACUUM TECHNOLOGY

Stabilization from the vacuum trephines allow the natural contour of the cornea to be maintained during trephination, thereby facilitating a symmetrical and consistent cut each time.

The vacuum trephines and punches are disposable instruments, including a single-hand operated syringe, which create the vacuum seal to hold the donor cornea tissue in place during trephination. This technology simplifies corneal transplants and eliminates the need for additional equipment.

Compact, lightweight design for **balance**

Secure vacuum

Radial inking prongs for suture placement

Clearly marked with **size**

.25 mm depth cut per full rotation

Non-slip grooved finger grips

RECIPIENT ADVANCED RADIAL VACUUM TREPHINES

GUARANTEED PRECISION
The secure vacuum facilitates accurate cuts and reproducible post-operative results.

REDUCED RISK OF SURGICALLY INDUCED ASTIGMATISM
16 radial inking prongs provide symmetrical markings to ensure proper suture placement.
