# LAB™EDGE KNIVES & BLADES PRODUCTS

Our Lab™EDGE portfolio of knives and blades are offered in a wide variety of sizes to meet all your needs during cataract surgery. Lab™EDGE is designed to offer best-in-class sharpness, precise cutting dimensions, and consistent cutting force through the use of electrochemical sharpening and grindless technology. This ensures the cutting edges of the blades are smooth, absent of residual burrs, and creates a true incision size that can be replicated consistently from blade to blade.

## FEATURES OF THE LAB<sup>™</sup>EDGE SINGLE-USE KNIVES

The Lab<sup>™</sup>EDGE knives have best-in-class sharpness\* that reduces the force required for penetration, creating a precise wound architecture and minimizing surface damage.

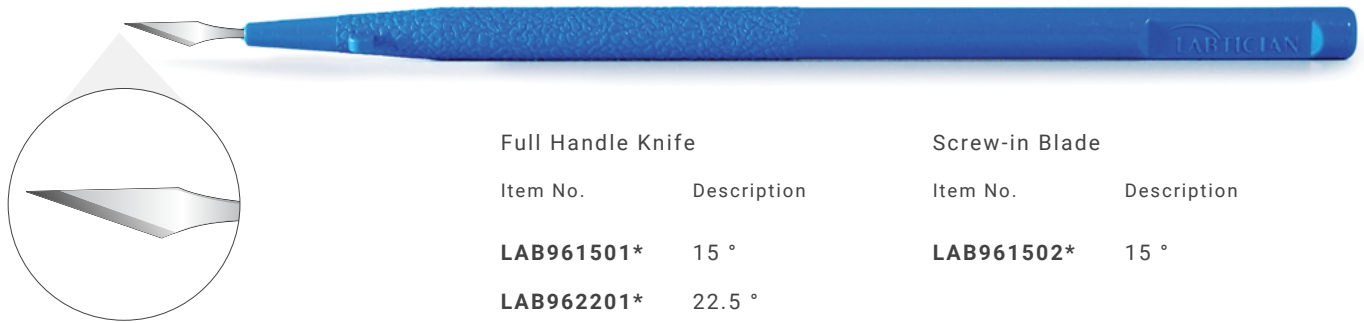

Lab<sup>™</sup>EDGE knives are manufactured using electrochemical sharpening and grindless technology to eliminate residual burrs on the cutting edges, producing a true incision size that can be replicated consistently from blade to blade.

For greater incisional accuracy, tip size is indicated in the description and on the handle.

\* Testing was performed on a Mark-10 Force Testing gauge and motorized stand that measures force over time.

**STAB STAB AND PARACENTESIS**

Full Handle Knife		Screw-in Blade
