Take 22

Sometimes I'm asked why the PRN De3 costs more than maybe the over-the-counter omega three supplements that you see on the store shelves. Well, it really comes down to effectiveness. You need the right dosage and you need the right form that will absorb enough to make an impact for eye health. And if you compare label to label ingredient two ingredient with some of those over-the-counter versions, you'll find that you might have to take a half a bottle of those a day in order to get enough in.

So the reality is that the cost of the de3 is actually very affordable when you look at it relative to the effective dose that will allow you to be more comfortable with your dry eyes.

Take 14

When your doctor recommended an omega three fatty acid supplement. You may have wondered, Oh, is that going to cause problems with indigestion or fish burps that you sometimes hear about associated with omega three fatty acid or fish oil supplements? Well, the good news is Prinze de3 is in a clean dietary form. It's just like eating a good piece of fish. Therefore, you're not going to have any of those GI issues that have been associated with fish oil and it can absorb and get to the eye to make an impact for your eye. Health.

Take 2

Sometimes patients will ask how long it will take before they start to feel the benefits of PRN De3. Well, clinical studies have indicated that that will occur sometime between eight and 12 weeks, so you can look forward to feeling better very shortly, probably within three months.

Take 4

Some people will ask how long they'll be taking the PRN De3 omega three fatty acid supplement. Well, omega three fatty acids are essential for our body. And you'll be taking these long term for nutritional support for not only your eyes, but your overall health as well.
